DAVID SVEZHINTSEV

Product Designer / Design Engineer

davidsvez.com daveranan@gmail.com +1 (918) 852-5497

Product designer and hands-on builder with 10+ years across digital products, creative technology, and games. I shape products from early concepts through working prototypes and launch, with a focus on interaction, usability, and practical iteration. Experienced leading multidisciplinary work while designing and implementing product behavior directly.

SELECTED EXPERIENCE

Game Director / Designer

Wanderstar UG **May 2023 - Present**

- Lightkeeper: led a funded game from concepts and pitching through playable vertical slice, shaping game design, UI/UX, progression, level design, prototyping, and production
- KERN: design and prototype investigative gameplay systems, tools, and interfaces directly in-engine; iterate on interaction details through hands-on use
- Flax Engine: re-design UI overhaul and implemented editor workflows for open source game engine, and interface feedback; contributed selected changes upstream.
- Directed and produced DAEDALUS: ALPHA, coordinating a 12-person production from planning through shoot and final delivery.

Project Director / Product Designer

UNFOLD.co **2020 - 2023**

- Dronies: led day-to-day production across nine design and development teams (~30 contributors), coordinating priorities and delivery with Solana Labs; the project generated ~$3M in sales.
- Client products: developed product strategy for, UX concepts, interaction design, and design systems for technology (UserWise) and healthcare (Merck) clients.

Product / UI Designer | Bad Jupiter **May 2018 - May 2019**

- Designed chatbot and web-app experiences, including onboarding, user flows, wireframes, and interactive prototypes in Figma and Framer; supported a Product Hunt launch

Designer / Web Developer | Idea Ranch **Nov 2015 - Jan 2017**

- Designed and developed brand websites, translating requirements into information architecture, interaction flows, visual design, and web implementation

TOOLS & COMMUNITY

Design & prototyping: Figma, Framer, Rive, interaction flows, design systems, user-interface prototyping
Implementation: HTML/CSS/JavaScript, C#, C++, Flax Engine, Unity
Community: Tulsa UX co-organizer and speaker; created beginner Figma and Adobe XD courses
